EN: Hotels are finding that their guests no longer merely want to consume. A healthy lifestyle, ethical and ecological values have increasingly become deciding factors for today's guests. Body care products are expected to be friendly both to the skin and the environment. The brands in this category aptly fulfil these high demands.

FR: Les hôtels prennent conscience que leurs clients ne souhaitent plus simplement consommer. Un mode de vie sain, et des valeurs éthiques et écologiques sont devenus des facteurs déterminants pour les clients d'aujourd'hui. Les soins du corps sont censés être à la fois bons pour la peau et pour l'environnement. Les marques de cette catégorie répondent parfaitement à ces demandes exigeantes.

ES: Los hoteles están descubriendo que sus huéspedes ya no solo quieren consumir. Los huéspedes esperan que los productos para el cuidado corporal sean respetuosos tanto con la piel como con el medio ambiente. Las marcas de esta categoría cumplen adecuadamente estas altas exigencias.

certification guide

EN: Hotels that want to live up to these new principles of healthy and ecological lifestyle have to select from an ever-growing number of green cosmetics. But with so many products on the market today claiming to be green, how can you tell which ones really are?
To clarify this, certification systems have been introduced to deliver consumer assurance. It requires some studying to figure out what each one means: eco-friendly, organic, fairly traded? ADA's 'certification guide' is the perfect tool to navigate you through the certification jungle.

FR: Les hôtels souhaitant respecter ces nouveaux principes d'une vie saine et écologique doivent faire un choix parmi un nombre croissant de produits cosmétiques écologiques. Mais avec autant de produits qui se revendiquent comme étant écologiques sur le marché actuel, comment pouvez-vous savoir lesquels le sont vraiment?
Pour clarifier ce point, des systèmes de certification ont été mis en place afin d'offrir une garantie aux consommateurs. Il faut toutefois se renseigner pour comprendre ce que chaque certification signifie: éco-responsable, bio, issue du commerce équitable? Le «guide de certification» d'ADA est l'outil idéal pour vous orienter dans la jungle des certifications.

ES: Los hoteles que quieren estar a la altura de estos nuevos principios de estilo de vida saludable y ecológico tienen que elegir entre un número creciente de cosméticos ecológicos. Pero con tantos productos en el mercado que en la actualidad afirman ser ecológicos, ¿cómo saber cuáles lo son en realidad?
Para aclararlo, se han empezado a utilizar sistemas de certificación para ofrecer seguridad al consumidor. Se requieren algunos conocimientos para averiguar a qué se refiere cada uno: ¿ecológico, orgánico, de comercio justo? La «guía de etiquetados» de ADA es la herramienta perfecta para recorrer esta selva de certificaciones.

The Fairtrade concept

1 **Fair pricing** due to the Fairtrade minimum price for raw materials and an additional premium for social projects

2 **Strict implementation** of labour standards

4 **Increasing awareness:** 8 of 10 consumers know the Fairtrade label

3 **Organic growth** without the help of harmful chemicals

source: http://info.fairtrade.net

Fairtrade is an alternative approach to conventional trade and is based on a partnership between producers and consumers. Fairtrade offers producers a better deal and improved terms of trade which are based on three key standards: environment, social standard and economics.

ENVIRONMENT
Environment standards for resource-saving and environmentally friendly production.

SOCIAL
The prohibition of exploitation and discrimination of workers.

ECONOMICS
Fairtrade minimum prices to cover the cost of sustainable production.
